DETAILED ACTION

Repeated Rejections

1. The 35 U.S.C. 103 rejection of claims 1-10 and 33 over De Luca et al. in view of Jostler et al. is repeated for the reasons previously set forth in the Office Action mailed 12/14/04, Pages 2-4, Paragraph #4.

Response to Arguments

2. Applicant's arguments filed 4/14/05 have been fully considered but they are not persuasive. Applicants argue that "when the Jostler and De Luca references are read as whole, they are not properly combinable in the manner suggested by the Examiner, and thus do not establish a *prima facie* case of obviousness." In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, De Luca clearly teaches an inflatable web comprising two sheets (see col. 2, lines 47-51) having inner surfaces sealed to each other in a pattern defining a series of inflatable chambers (Fig. 2, #21) of predetermined length, each of the chambers (Fig. 2, #21) having at least one change in width over their length; an inflation port (Fig. 2, #41) located at a proximal end of each chamber, the inflation ports being formed by

intermittent seals (Fig. 2, #43) between the sheets; and longitudinal flanges formed by a portion of each of the sheets that extend beyond the inflation ports and intermittent seals. Jostler was merely cited for suggesting that it is old and well-known in the art to have longitudinal flanges having a pair of open, unsealed edges (Fig. 1a, #24a,b; also see col. 2, lines 39-45) and that it would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the longitudinal flanges in De Luca to have a pair of open, unsealed edges as suggested by Jostler in order to fill the pockets (chambers) with some material. One skilled in the art would clearly be able to modify the longitudinal flanges in De Luca to have a pair of open, unsealed edges in order to inflate the chambers, if so desired. Thus, the claims fail to patentably define over the prior art as applied above.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
